

One in two Californians will be diagnosed with cancer in his or her lifetime. And the outcome of their diagnosis often depends on whether the disease was caught early. That's why City of Hope is bringing cancer and disease prevention services directly to you with our mobile screening and prevention clinic.

The City of Hope mobile clinic offers qualifying clients state-of-the-art screening services for multiple cancer types, specific genetic disorders, sexually transmitted infections that may increase cancer risk and other conditions. Mobile clinic clients also have access to City of Hope's world-renowned clinical trials and research programs, lauded for pioneering technologies that have led to breakthrough treatments used around the world.

Bringing World-Class Cancer Care to You

Step inside City of Hope's 40-foot mobile clinic and you'll find:

- A full staff, including nurse practitioner, nurse, mammography technologist, and support team
- Changing rooms
- A private exam room

City of Hope is among 56 National Cancer Institute (NCI)-designated comprehensive cancer centers in the nation. And it has once again been recognized by U.S. News and World Report as one of America's Top 10 hospitals for cancer care — the 17th consecutive year it's been named among the nation's elite hospitals for cancer.

Our mobile screening program allows us to bring world-renowned care to your community. It's just one way we deliver on our commitment to improving the health and quality of life for all Southern Californians through cancer and disease prevention, education and screenings.

Mobile Screening Program Services

City of Hope's mobile screening program offers a variety of lab tests to assess your overall health. Qualifying clients include those who meet age and risk guidelines established by the U.S. Centers for Disease Control and Prevention (CDC), the U.S. Preventive Services Task Force (USPSTF) and other agencies. The program also offers:

- Lab tests intended to detect specific viruses or substances that may raise the risk of cancer
- Genetic tests designed to detect hereditary cancer syndromes or genetic abnormalities linked to cancer and other diseases
- Cancer-prevention vaccines for qualifying clients

Our mobile screening program assesses your risk for a wide range of cancer types, including:

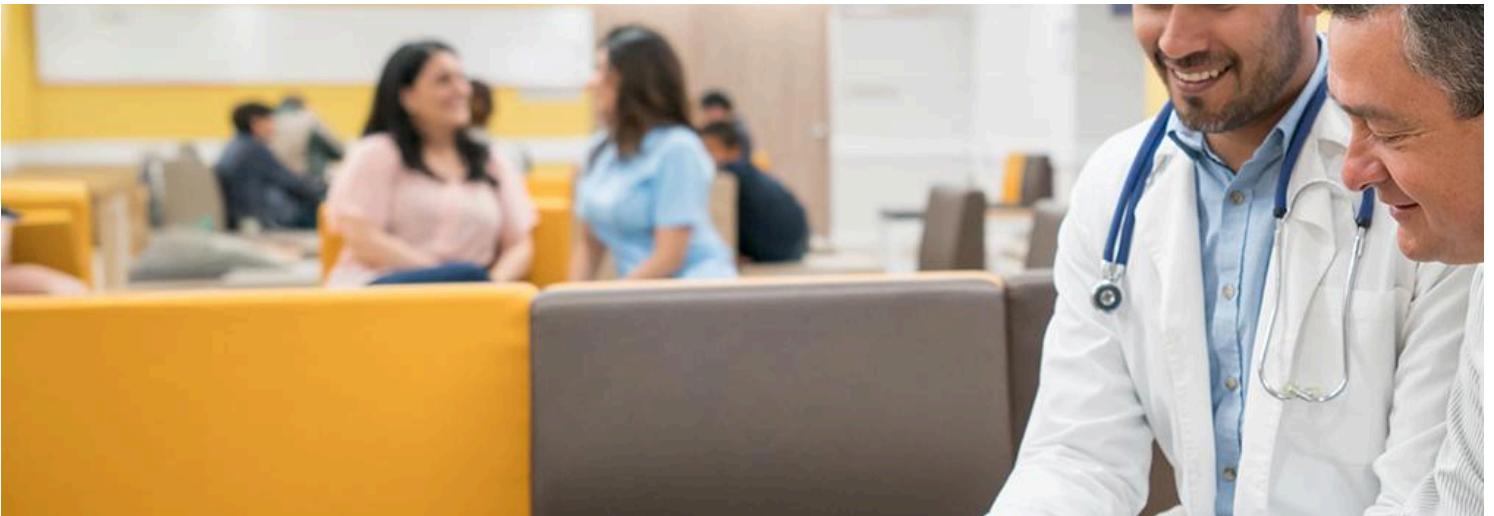

- Breast cancer
- Certain brain cancers
- Cervical cancer
- Colorectal cancer
- Gallbladder cancer
- Prostate cancer
- Skin cancer
- Testicular cancer
- Thyroid cancer
- Gastric cancer
- Head, neck and oral cancers
- Liver cancer
- Lung cancer
- Ovarian cancer

Our City of Hope mobile clinic brings cancer and health care experts to you.

Your Partner in Cancer Prevention

Early detection of cancer is key to producing positive treatment outcomes. But the best outcome of all is to prevent cancer in the first place.

While some cancer risk factors, such as family history and environmental factors, are out of your control, adopting healthy lifestyle habits may go a long way in reducing your risk of cancer.

City of Hope is dedicated to cancer prevention and offers an array of prevention, risk reduction and early-detection education services. Patient education services are also available in our mobile screening and prevention clinic.

They include:

- Nutritional guidance
- Physical fitness and activity planning
- Mental health resources
- Smoking cessation
- Breast self-exams
- Cancer screening recommendations
- Health and wellness advice

City of Hope's navigators are able to assist clients in multiple languages.

We Make It Easy to Access Your Mobile Clinic Test and Screening Results

You can view your results on the [MyCityofHope patient portal](#), or you can choose to receive them by phone or email.

Through *MyCityofHope*, you also can:

- Access medical records
- Review your medical history
- Check your current medications
- Communicate with your team
- Pay bills
- Schedule future appointments
- Visit a City of Hope doctor virtually

City of Hope will work with each patient to understand his or her insurance coverage and, when appropriate, will submit claims to insurance. Patients may also apply for one-time financial assistance through our institutional policy.

The availability of your test results depends on a variety of factors, including the type of test or screening procedure you had.

You may choose to receive results via the convenient *MyCityofHope* portal, or you may receive their test and screening results by phone or email. If you receive a positive finding on your screening tests, a nurse navigator will guide you through the possible next steps of the diagnostic process and provide appropriate resources. However, you are not obligated to receive any additional care at City of Hope. Please talk to our mobile clinic staff about the best options for you.
